

**PACKAGED ICE**

**Model 525 Form, Fill & Seal**

The HAMER Brand Model 525 ice bagging machine provides versatility and high speed in fully automated bagging of packaged ice. Run all popular bag sizes from 5 to 25 lbs. on a single machine. This ice bagging machine comes complete with a volumetric filler for high-speed ice dosing.

The HAMER Model 525 features a wire tie bag top closure.

# HAMER Model 525

## FORM, FILL & SEAL BAGGING AUTOMATION

### FEATURES

- Labor savings and increased productivity typically equal to one year investment payback
- Bag cost savings of up to 20% and less storage space with pre-printed, center-fold poly film compared to premade, open mouth bags
- Corrosion-resistant, stainless steel, heavy-duty construction for ease of cleaning and long-lasting, trouble-free service
- Horizontal, compact design accommodates system location in low-overhead areas under existing equipment
- Automatic imprinting of date/shift cod on bags is optional
- Design eliminates product spills and wasted bags
- Conveyor easily adjusts to accommodate different bag sizes
- Microprocessor controlled systems and operations assure reliability and consistent performance

### SPECIFICATIONS

- Dimensions: 115"L x 35"D x 86"H
- Clearance: 3-ft clearance recommended all sides
- Capacity: Bag Sizes 9" to 24" wide, up to 40" long; Poly thicknesses: 1.5 mil minimum
- Speed: 40 bags/minute (Speed up Kit available for 50 bags/minute)
- Installation Requirements: Individual model requirements are available upon request

*Specifications may be subject to change without notice.*
